

# Bi-monthly Report

**Lantian Li**

CSLT / RIIT

Tsinghua University

*June 26, 2015*

- Improved deep speaker vector
  - ✧ Semi Test-independent SV
    - ✓ Phone-dependent training
    - ✓ Non-linear dimension reduction
  - ✧ Test-dependent SV
    - ✓ Segment pooling
    - ✓ Dynamic time warping (DTW)
  - ✧ Score Combination

- Discriminative feature selection on Score-level
  - ✧ Speaker Clustering
    - ✓ K-means ('Elbow method')
  - ✧ Discriminative score-feature selection
    - ✓ Ranking Distribution
    - ✓ Cohort Score / Difference
  - ✧ Discriminative scoring – binary classification
    - ✓ DNN / SVM

- Speaker Embedding
  - ✧ I-vector Clustering
    - ✓ K-means ( cosine distance )
  - ✧ Model training
- Binary Representation
  - ✧ Block-training / LSH

*Thank you*
